Exceptional organizational skills
Creative Thinking

PROJECTS

• Inventory Management system

Developed an Inventory Management System leveraging Asp.Net Core and SQL, facilitating seamless stock in and stock out processes. Designed intuitive interfaces and ensured system reliability through rigorous testing, enhancing operational efficiency.

• Point Of Sale

Developed a comprehensive desktop POS system using C# Winform with category-specific sections for streamlined addition and removal of inventory items in a grid, enhancing organizational efficiency.

• Email And Password Generator

Developed a C# tool for generating random email-password pairs and used FileStream class to store random email-password.

• React Mini Projects

Developed an innovative website featuring multiple mini projects that enhance and demonstrate ReactJS concepts. Leveraged ReactJS to create a responsive and engaging user experience
